I'm writing in support of this bill to restore access to health care for immigrants, many of whom have worked on the frontlines during the pandemic risking their lives without the safety or ease of access to medical care for themselves or their families. We know how critical preventive health care and care for chronic conditions like heart disease and diabetes is, so why would we deny anyone that basic fundamental right to care because of their status of citizenship? Especially when they contribute to our Maine workforce and economy as any other resident. It's time to reestablish healthcare for immigrants, so please vote yes on LD 718. Thank you.
