

Janet Drew
York

I support all bills and proposals that move more services into the community setting, including mental Health, addiction & recovery environments.

With covid \$ coming to all levels of govt in ME, we need to invest in Human Capital. Partner to hire counselors and develop activities for wellness, sustainability & opportunity. It's all related. Invest in families to prevent the next generation of impoverished hopeless addicted and incarcerated neighbors.

Last week the commissioners in York County approved hiring a graduate teacher to be a FT corrections officer at the jail for 28,000 /yr.

Community programs could extend learning and support times beyond a 7-hour school day to help at risk families

I want teachers to be able to teach for a fair wage and help all the community rather than find the only job is thankless one as an underpaid corrections officer

All levels of government are getting stimulus covid money and it should be put in community programs
