

Janet Drew
York

I support all bills and proposals that move more services into the community setting, including mental Health, addiction & recovery environments.

We also need preventative programs that support low wage families, divert all non-violent and drug use, & bail issues away from the trauma of incarceration, which disrupts whole families and communities can cause job loss and homelessness

Last week the commissioners in York County approved hiring a graduate teacher to be a FT corrections officer at the jail for 28,000 /yr.

Community programs could extend learning and support times beyond a 7-hour school day to help at risk families

I want teachers to be able to teach for a fair wage and help all the community rather than find the only job is thankless one as an underpaid corrections officer

All levels of government are getting stimulus covid money and it should be put in community programs
