I am urging you to support LD 718 and expand Mainecare eligibility to immigrants in Maine. Immigration is vital to the diversity and economy in Maine and all of us deserve the safety afforded to us by having our health care needs met. This ongoing pandemic has shown us that it is vital we are all protected and given access to necessary medical care. We must work together to address the disparities in health care coverage so that immigrants, people of color and low income citizens of Maine are able to access lifesaving testing and care. It is clear the people of Maine are in favor of expanding Mainecare to everyone who lives and works in our state.
