

I am writing to give my support towards LD 1157. As a DSP myself – working in this field for the past 7 years – my thoughts and perspectives come from an intimate, firsthand perspective and I appreciate the opportunity to share with you all today.

Many bills being presented today seek to take steps towards addressing the growing DPS workforce crisis which is in an encouraging and much needed step in the state of Maine. Among the many issues which contribute to this problem are wages/reimbursement rates that do not align or keep up with the realities of a changing world. LD 1157 would give some much needed flexibility by agencies to respond to greater economic shifts in a timely and appropriate fashion.

Sincerely,
Tyler Heydolph
