I am humbly writing to greatly support LD 1573 based on below but not the least reasons or facts:

- Mainly the fact that the cost of life has raised up in general in Maine in particular.
- This type of work for assisting people who need special care in almost every thing , a caregiver in most cases needs to work tirelessly with a high level of self motivation, love , respect in the way of feeling the pain or the concern of the individual whose needs a support. This makes this job become huge and in many situations harder than it may appear or sound.
- Possible risk of getting contaminated in case of contagious disease or sickness ( especially during this pandemic " covid19") as you may know as DSP you try help as you would help yourself thus close contact is almost unavoidable ( I.E : when feeding, giving shower, passing meds act).
- Dealing with someone's life for everyday life-basis is a high responsibility and risky and would deserve little more extra value with respect to the cost of life today.

The consideration of my provided reasons and facts and any value that maybe attributed to will be greatly appreciated.

Emmanuel
