

Linda Reardon
Orrington

No matter who you are and even with no medical experience this is an extremely bad bill. As a medical professional I can tell you there is no such thing as a disease free world. Germs mutate all the time and some germs protect us. What we need is a good immune system not people trying to control our bodies with nano worms and genome testing which is what Covid tests are. This is a non starter and for the sake of humanity OUGHT NOT TO PASS.
