Hello, to all involved i would like to tell you about how vaping has effected my life and overall health since it was the only method of quitting smoking cigarettes that worked for me. i had smoked cigarettes for five plus years and did not see a way out until trying vaping, once able to vape and use flavors to help get away from tobacco i never smoked again. Going forward with a ban of flavored tobacco products is going to drive the majority of good Americans that use vape products back into smoking tobacco and further fill pockets of bigger tobacco companies that do NOT have public safety and heath in mind whatsoever, if I am to be made to use flavored e-juice that is only tobacco I would likely just go back to smoking cigarettes putting the years of not smoking to waste.

Thank you for your time.
