I am urging you to ban the sale of all flavored tobacco products. (LD 1550). These products are dangerous to all people but especially children. As a former registered respiratory therapist and now a licensed psychologist who works with children, I know firsthand the danger that tobacco products can cause. Even though these products are flavored they are still as dangerous if not more so. I also know how impressionable children are and how they may not think about long-term consequences when picking up a bad habit. Tobacco companies are famous for targeting vulnerable populations such as children. I ordered you to please ban the sale of these dangerous products in Maine.
