As an adult well over the legal age to smoke/vape/consume alcohol, I would like to retain my options for an alternative to smoking cigarettes. Not only do I feel that those of us of legal age deserve to have options available to us, I can only think of the economic impact a ban like this would have on our economy. As far as flavored smoking alternatives seeming to be appealing to minors, I have noticed that regardless of bans, laws or any other such crackdown on keeping adult products out of the hands of minors, they will always find a way. Not to be a naysayer, but it is a harsh reality!
