

Abigail Corson
Westbrook

Hello my name is Abby Corson. I reside in Westbrook. I suffer from a nerve pain syndrome that is chronic and constant. It's called CRPS. I used to smoke about two packs a day because my pain is so bad. I ended up switching to a device that is only .3% nicotine and my intake has gone down so much. It's helped me finally quit cigarettes because I would rather taste anything than tobacco. If I wasn't able to get my current vape juice I would probably just go back to cigarettes since my pain is still so bad and my condition is so stressful for me. Please allow us to keep this healthier option for people who need it.
