Lyman

I was a heavy smoker for over 20 years and could never kick the habit. I was introduced to vaping and was able to quickly stop smoking. I ask that you visit local vape shops and listen to the stories of adult vapers and see how these shops do business. I have been smoke free for 12 years and worry that this ban will cause myself and many friends to start smoking again. The state has stopped online sales and the local vape shops do a great job of keeping underage people out of their shops. If this bill is passed it will do way more harm than good. I have no issues with going after companies that try to market to young people and I believe this is happening now. Please give adult Mainers the option to better their health. I truly believe that vaping should be supported as a harm reduction alternative to something that we all know is very dangerous.
