I have used vaping products over the few years to get away from using traditional tobacco products, i personally think flavored vape juices should not be banned because it keeps me and many other adult users away from tobacco. I think its ridiculous that there can be flavored alcohol, and that never raises an issue for children, but flavored vaping products are an issue? Adults should be able to make their own decisions. As an adult, if i were to be using nicotine i would prefer to do something proven to be safer than smoking cigarettes, with flavors of my choosing.
