

Julie Parker
CIGARET SHOPPER

To whom it may concern,

I am writing this asking you to vote no on the banning of menthol and all flavored tobacco. This will hurt so many small business's in the state and the people that work in this state. We will lose our jobs and businesses will close. It will make everyone to try to make there own again and not know how and that is more dangerous than menthol cigarettes. Because it will be boot legged and we know what happens when people boot leg things. That is why JUUL got into trouble because people were using there product to make fake ones. So for the safety of the public it would be best to vote no.
