If it wasn't for Menthol e-liquid I would be still smoking regular menthol cigarettes. I use to smoke 4 packs a day until I switched to vaping. Thank to vaping I no longer wake up in the middle of the night not being able to breath. I also no longer wake up the whole house coughing up a lung so to speak every morning. Vaping has improved my lung health, although the damage is done from smoking to ban all flavors like menthol, yet menthol cigarettes remain is completely unfair. All your trying to do is force people back to smoking which by science has proven is a lot worse on a person then e-cigarettes.
