Milk
Life savers?
Fire alarm dust covers

I am extremely frustrated to hear that the Maine legislature is considering LD 1550, which would double the taxes on cigarettes, and ban all flavored tobacco products and menthol cigarettes for adults 21+. I oppose LD 1550, as it could have harmful effects on our communities, and takes away the rights of adults to have easy access to safer smoking alternatives.

A ban will not make these products go away. Instead, the illegal market will step in to feed the demand for banned products. This could increase crime in Maine, put consumers in danger, and hurt law-abiding, taxpaying small businesses that create jobs in our state. I for one will find away to continue to manufacture my own vape juice, regardless of what gets voted into place. It is not right that others will not have that option.

Of course, kids shouldn't use tobacco products. That's why the government raised the minimum age to buy tobacco to 21. Banning legal flavored tobacco products and menthol cigarettes for adults 21 and older goes too far, and is just bad policy.

These products are already heavily regulated, And vaping flavored e-liquid saved my life, my wife's life, and countless others!

There is no evidence of enough bad to dismiss the good that these flavored vapor products have been able to accomplish. The science doesn't lie, vaping saves lives, FLAVORS save lives. Don't become a murderer, vote against any bill that would ban any vapor product, or make it harder for adults to purchase.
