Flavored tobacco saved my life. I smoked cigarettes for years. I don't share with anyone. And with the pandemic the fact I have to drive hours to get it at a store. When I used to be able to get it online. I enjoy vaping im an adult and I should I should be able to choose what I want to vape. I hate mint and tobacco flavors. I mean if you want me to spend my money in another state I will do that. But I beg of you not to enact this law. And as a matter of fact i wish the online ban should be repealed because of the pandemic more people are stressed and don't want to turn to tobacco cigarettes. And the fact we can't order online.
