

Karie Ball
Washington

Members of the Health and Human Services Committee. Thank you for your time and service to our state. My name is Karie, and I live in Washington, in Knox county. I urge you to vote Ought To Pass on LD 867. Mandating medical procedures, medicine, or vaccines is a bad idea. Every person should be able to weigh the benefits for themselves. You should not have to take an injection to keep your job, or to participate in society. I have already recovered from Covid, and as such have the same immunities the vaccine would provide. Therefore I do not need vaccine-induced immunities. Again I urge you to vote Ought To Pass. Thank you
