I have enclosed 2 links for the same informative report Please High light links and right click to open web site

Former UN staff member Claire Edwards:

"'The CV-19 Genocide of 2020' - 21:13

"This is a very informative 21 minute video and I would urge everyone, whatever your beliefs, to please take the time and watch.

This Bill SHOULD pass I am for this bill LD867

Thank you for your time and consideration Health & Human Services Committee. May this video inform each of you to vote with your conscience with understanding that none of these jabs have been FDA approved as a vaccine. These covid 19 experimental ingredients have only EUA. They are experimental trials and Nuremberg hearings have already began, due to the VAERS data and scientific testimonies against them. We need each other like never before. Let Maine stand as the beacon of spirit and hope for humanity that Maine,nation and the world so desperately need at this time. That we have come together as a free people and State as God has intended for us to stand in righteousness for life liberty and happiness. Again, thank you and I pray that each of you will unanimously support this bill and our 10th Amendment powers to do the right thing, protecting the people,especially when natural therapeutics and medicine were already available to work effectively against this questionable virus which has a 99.98% survival rate. We do not have time to wait on all the court cases accumulating to hear all the evidence in these covid19 wrong doings when we hold the power to act for the safety of our children and families from the covid19 experimental harms.They can only be termed in biblical proportions which has come against truth, science and humanity. Have a good day and I pray you have the opportunity to watch this informative video.
