

Please support LD 867.

My brother, a healthy, active and vibrant man, has experienced blood clots since taking a COVID-19 vaccination.

My sister, Donna, has experienced unknown water retention in her legs and extremities since taking a COVID-19 vaccination. Causing her to gain several pants sizes.

My friend, Troy, nearly lost his friend from a COVID-19 vaccination. She is currently relearning how to walk.

Please, support LD867 to stop vaccine mandates. Please, allow additional time for the science to be clear on these vaccines.

Thank-you,
Alicia Collins
