

Kimberly Carew  
Newcastle

This bill should pass. No one should be mandated to take an experimental drug (The FDA approved drug is not available, and has not been fully tested). Remember Nuremberg? I believe in the constitution, and my right to choose what medicines I put into my body. Never, in the history of this country, has such a thing happened. There have been thousands of deaths due to this vaccine, and none are being looked into. I fully support this bill.
