

Dear Legislators:

I am writing to affirm my support for LD 867 - An Act To Prohibit Mandatory COVID-19 Vaccinations for 5 Years To Allow for Safety Testing and Investigations into Reproductive Harm.

I see by the latest VAERS report, that of Dec. 24th, that 21,002 deaths have managed to get reported since the release of the CoViD-19 vaccine suite. The Harvard study by Ross Lazarus and colleagues in 2011 determined that *“Although 25% of ambulatory patients experience an adverse drug event, less than 0.3% of all adverse drug events and 1-13% of serious events are reported to the Food and Drug Administration (FDA).”*(<https://digital.ahrq.gov/sites/default/files/docs/publication/r18hs017045-lazarus-final-report-2011.pdf>)

That means a potential of 2.1 million deaths have resulted from these EXPERIMENTAL, UNTESTED (well, I guess WE are the test) gene therapy drugs.

As if that weren't bad enough, I would remind you legislators (I presume you know this full well) that the EUAs issued for them are ILLEGAL, inasmuch as they violate the EUA statute:

21 U.S. Code § 360bbb-3 - Authorization for medical products for use in emergencies

Section C: (c) Criteria for issuance of authorization

The Secretary may issue an authorization under this section with respect to the emergency use of a product only if, after consultation with the Assistant Secretary for Preparedness and Response, the Director of the National Institutes of Health, and the Director of the Centers for Disease Control and Prevention (to the extent feasible and appropriate given the applicable circumstances described in subsection (b)(1)), the Secretary concludes—

(1)(2)

(3)

that there is no adequate, approved, and available alternative to the product for diagnosing, preventing, or treating such disease or condition;

I declare to you what you should and probably do already know, that many excellent, approved and (were) available (although there was a massive destruction campaign in 2020, including raids on pharmacies): hydroxychloroquine and ivermectin being the two most prominent and proven effective.

Allow me to quote (fair use) from R. F. Kennedy's new book, The Real Anthony Fauci:

In compliance with the WHO recommendation, Switzerland banned the use of HCQ; however, about 2 weeks into the ban, Switzerland's death rates tripled, for about 15 days, until Switzerland reintroduced HCQ. COVID deaths then fell back to their baseline.¹¹⁸ Switzerland's "natural experiment" had provided yet another potent argument for HCQ.

Similarly, Panamanian physician and government advisor Sanchez Cardenas notes that when Panama banned HCQ, deaths shot up, until the government relented, at which point deaths dropped back to baseline.¹¹⁹

Seven months into the pandemic, nations that widely used HCQ and made it readily available to their citizens demonstrated overwhelming evidence that HCQ was obliterating COVID-19.

I could quote a hundred similar proofs that the banning and blockading of these excellent drugs (HCQ has been in the WHO list of ESSENTIAL MEDICINES for seventy years. What is their flaw? THEY'RE TOO CHEAP!! They'll kill the sale of the often lethal remdesivir. They'll cure people at home. The hospitals get NOTHING out of the deal.

People of Conscience, step forth, make your children proud, when this ALL COMES OUT. It won't be long. A major Crime Number has been filed in London in the last three weeks, Dec. 20, 2021:

"Metropolitan Police Crime Number: 6029679/21. International Criminal Court (The Hague) Case number: OTP-CR-473/21

The world's largest-ever international criminal investigation is now under-way, involving Hammersmith Police and The Metropolitan Police."
