

Durant Cole
Portland

These vaccines have NOT been properly tested and are producing adverse events and deaths. No vaccine mandates can be permitted. It is now abundantly clear that the COVID-19 vaccines are 'leaky' (leaky vaccines do not stop infection or transmission and allows for immune escape) and do not sterilize the COVID virus (are non-neutralizing or lose this capacity very quickly). These vaccines show that the more vaccinated a nation is, the more problems they are having with the vaccine in terms of escalating infections. These vaccines do not adequately protect the upper respiratory tract. The data is clear that the vaccinated can transmit as efficiently as some who are completely unprotected.
