

Justin Connor
Searsport

To the Distinguished Members of the Health and Human Services Committee,
Thank you for accepting my written testimony.

I am writing to express my emphatic support of LD 867 which would allow the COVID-19 vaccination to undergo 5 years of safety testing and and allow investigation into the effects on reproductive health for women and their unborn children.

No further explanation is really needed- the bill itself explains most of my concerns. I implore you to pass this bill as medications for COVID-19 infections, as well as health and safety protocol continue to be updated to help us fight the pandemic.

Thank you,

Thank you,
