To Whom It May Concern:

I am writing in SUPPORT of LD867: An Act To Prohibit Mandatory COVID-19 Vaccinations for 5 Years To Allow for Safety Testing and Investigations into Reproductive Harm.

None of the Covid19 vaccines, also known as experimental gene therapies, available in the United States prevent Covid19 infections OR prevent the spread of the Covid19 virus.

Mandating a vaccine which has no efficacy is unethical and most likely will be ruled unconstitutional by the Supreme Court in the coming days.

Maine is wasting precious time and resources on ineffective mitigation efforts.

Maine would be better served if government officials spared rapid tests for ill (i.e. symptomatic) individuals, treated them with the safe and effective HCQ and ivermectin, and advise everyone else at low risk to resume their normal lives.

**YOU CANNOT MANDATE AWAY A RESPIRATORY VIRUS!**
