Members of the HHS Committee:

I am writing to you to voice my concerns about mandates, especially the one for the Covid-19.

NO VACCINE SHOULD BE MANDATED....PERIOD!! This new "VACCINE" is not a "normal" vaccine. This vaccine changes your DNA. Dr. Robert Malone, the inventor of the MRNA vaccine, is alerting people to its danger. There have been TOO MANY adverse reactions to this particular injection.

Some people have experienced seizures and tremors that are so bad, they either never go away or come and go without notice. Pericarditis and myocarditis is also a side effect for the younger people. These are heart problems that cannot be cured and NEVER GO AWAY. Blood clots or clotting issues and strokes are another side effect. I know of 2 people that had these problems. Now that they have "approved" this vaccine for children, the children are starting to have all the above symptoms and including DEATH. Is this what we want for our future generation?

Did you know that the Vaccine Safety Data sheet in the boxes is blank? How can you have Advised Consent when the Safety sheet is blank? What is the pharmaceutical company hiding from us? Why did they want to take 50 years to give the public and other Doctors the details of this vaccine and the ingredient list? This is in the courts now and the Judge ruled they need to produce this information within months, not years.

PLEASE, PLEASE, PLEASE, can we go back to some semblance of common sense??? This injection is dangerous. And in case you are not aware, there is a case in front of The Hague "For Crimes Against Humanity". If anything, these last two years are a testament for why we have a case at The Hague. We are re-living the Holocaust all over again. (VAX mandates, VAX paperwork for proof that you are VAXXED, does this remind you of Hitler)?

Our Forefathers wanted us to be FREE and not be under a tyrannical government rule. These Mandates are completely UNCONSTITUTIONAL. Our Forefathers are rolling in their graves right now.

Thank you for your time
