

Jimmy Haas
Portland

Hello Senator Claxon, Representative Meyer and committee members.

I am in favor of an ought to pass choice on LD 867. A five year moratorium is a fine thing to have in place, however any of the current or proposed vaccine mandates are not Lawful nor could they ever be construed as Moral.

Simply – modern science has never proven to be able to slow or halt the cold and flu season - nor predict the ups and downs of severity in a place for that particular year. These experimental injections that are still in trial, where the control groups have already been released, with beyond alarming VAERS data available, have nothing to do with true science or health but only fraud, fear, confusion and mass psychosis.

Thank you for your potential movement away from Tyranny.
