I support LD867

I oppose mandatory Covid vaccination for both adults and children as there hasn't been nearly enough time for long term safety data! I am very concerned about my children's safety and future fertility as well as the trials won't even be completed until around 2024/ 2025! If this became mandatory for school age children at this time I would sadly have to pull my children from public school as I'm very uneasy to give them an experimental vaccine! Thank You for your consideration!
