I support the LD 867 _ Prohibiting Mandatory Covid -19 Vaccinations.

The studies are showing so many vaccine related injuries and the vaccines are not safe for so many, it is inhumane to make people choose between their career/ employment and their right to choice what goes in their body.

The CDC has admitted that the "vaccine " does not stop transmission so it is not necessary for people to be vaccinated it does nothing to stop transmission. There are sure and remedies that work but they are being censored.

The tests are creating false numbers and creating fear and contributing to mental health issues.

The vaccine efficacy is failing so it makes no sense to continue doing something that is not working. You can not expect people to get boosters every month to prevent a curable illness.
