Please support LD 867 An Act To Prohibit Mandatory COVID-19 Vaccinations for 5 Years To Allow for Safety Testing and Investigations into Reproductive Harm.

The current vaccines for COVID-19 are experimental because they didn't use COVID-19 to create the vaccine. It is all manufactured in a lab. We don't know the long-term effects of these vaccines. Last year people were told if they got the vaccine they wouldn't have to wear a mask or have to worry about getting COVID-19. That has proven not to be true. People who have gotten the vaccine can get COVID-19 and pass it to others. Everything people claim to know about the vaccine has proven to be not true. The current narrative is it is safe, but the officials who keep claiming it is safe have been wrong about the vaccine. We don't know if it is safe!

There has been a court order for one of the manufactures of the vaccine to produce information about what is in the vaccine within eight or nine months. The fact that this company wanted to keep the information from the public is a huge bright red flag. We have a right to know everything that is in any type of medication and then determine if it is safe to take.

Manufacturers of vaccines cannot be sued if it causes harm to a person or people. If the vaccine is unsafe there is no possibility of holding the manufacture accountable for any harm that is done.

To require someone to take something that has the potential of being harmful is wrong. We don't know enough about how this experimental vaccine works and if it is safe. Nobody should be forced by the government or anyone else to take something he/she believes is unsafe or might be unsafe.

There are a lot of people who are afraid of COVID-19 and choose to take an experimental vaccine, hopefully knowing the risk of it potentially being unsafe. That was their choice. There are a lot of people who are afraid to take an experimental vaccine because of it potentially being unsafe. That is their choice. Please respect the choice not to potentially put your life at risk by taking the vaccine.

Because officials have been wrong about this experimental vaccine there is a huge potential of the claim of it being safe to be wrong too. We don't know if the experimental vaccine is safe. Nobody should be forced to take something, which has the potential of being unsafe. Please support LD 867
