

Rob Lord  
resident of Falmouth

A decision to mandate Covid-19 vaccines should require our State Legislature's deliberation, rather than orders from the Governor's administration. I strongly support this bill. It is one step toward our Legislature claiming its significant authority in the guidance of our public health decisions.

Covid-19 vaccine mandates cause real harm to important segments of our Maine economy. Vaccine mandates also unfairly cause real injury and disability to an unfortunate minority of our fellow Mainers.
