

Francine Michaels
Kennebunk

My name is Francine Michaels and I live in Kennebunk Maine and I am writing to Support LD867 to Halt Vax Mandates & Put a Moratorium on Shots for Pregnant Women In November of 2020 I got covid-19 and though it was not a pleasant experience, my illness did not require any intervention of medical treatment of any kind. This amends my previous submission because I had not added that I am supporting LD867.

A few weeks ago that I noticed that people were getting their boosters and another wave of sickness went through the facility to the point that there were, on my shift, over 25 percent of the people out sick, seven people in only one week's time were specifically diagnosed with COVID-19. With so many giving in to getting these alleged vaccines, why would the numbers be going up rather than down?

People should not be mandating vaccines, when they have no idea what they are doing-how many of these spike proteins are entering the atmosphere and what damage that is going to do to those people that are around them.

Can you verify that these alleged vaccines are not actually the very things that are creating the variants that are affecting people? Because it looks from statistics that the more people are taking these alleged vaccines, the more people are in fact getting infected, the more hospitalizations are taking place and the more people are out of work?

I am not an anti-vaxxer. All vaccines are not bad. The polio vaccine has likely saved millions of lives. This however, is not like polio. Polio didn't suddenly mutate as people took the vaccine.

The polio vaccine did not affect those around the people that took it.

The very people that are making money from these alleged vaccines are the very people that are trying to enforce others to take it. Some may have the best of motives, but the results are clear. People are sicker than ever. I don't need to be a scientist to prove it.

In the beginning you could see rarely that anyone would die. Now I've seen more and more end up in the hospital. Why is that?

Mandating vaccines is mandating not only deaths for those that have a reaction, but it also makes those that mandate it culpable to the collateral damage that happens to those people that around those that have been vaccinated.

It appears that these alleged vaccines are recirculating the virus so that it will mutate to other forms.

It doesn't take a scientist to see since people started getting vaccinated then suddenly the virus began to mutate and people began to die at greater levels. More people are dying as more people are getting vaccinated. It is simple math.

Mostly recently I tested positive for covid-19, and when I asked the doctor if this was covid-19 why did I have virtually no symptoms the only thing he could say was maybe because I have a good immune system. He couldn't say, maybe because I had a "natural vaccine". When studies in Israel showing natural immunity are ignored, this is a problem. Are the people in Israel somehow different from everyone else in the world?

This is suppression of the truth and should never be allowed in a free society.

Something is forcing these alleged mutations. I believe the mandates in this state have created a hotbed of sickness, overwhelming the physicians, nurses and the medical staff.

It has caused a staffing shortage in nearly every industry in this state of Maine.

Quite frankly, I am deeply concerned that lawmakers have not forced data regarding spike proteins and how they may be affecting the people that are around those that have made the decision to receive these jabs.

It is unconscionable to be to think that our lawmakers have allowed so many people to get sick and die without being able to even receive the appropriate treatment and are instead trying to enforce regulations mandating these jabs that will cause people to continue to get sick and likely sicker than they would have been otherwise.

Instead, lawmakers have not intervened to allow people to get the right treatments that do not add to the pocketbooks of the FDA and the pharmaceutical industry. People have not been allowed to choose their treatments and have had those treatments chosen by those that clearly have a conflict of interest.

Even the CDC has finally decided to recognize that people that get the jab can infect others. I can see how people have money invested in people getting sick and dying due to covid-19 and therefore information to counter their investments has been actively suppressed across the world.

I don't need to be a scientist or data technician to make these calculations.

To force a vaccine mandate is to allow people to continue to reap endless amounts of money at the blood of the innocent, while denying all the while they are doing it. The need for jabs would be endless because the number of variants they are creating by the jabs would be endless.

If you cannot prove that this is true, it is only because any data to this end is being suppressed. That in and of itself is enough to cause suspicion that this should never be done.

I know someone now that may be sick from covid who is refusing to get tested, because she does not trust the tests. How did that happen? From the suppression of information and from the misuse of government authority.

I pray that God above will give you the wisdom to understand that these mandates are not about helping people, but about forcing this rage of sickness to continue at unprecedented levels by keeping the spike proteins circulating into the atmosphere.

To substantiate these claims that I am personally witnessing I submit the following:

<https://principia-scientific.com/covid-vaccinated-can-shed-spike-protein-harming-unvaccinated/>

<https://www.holistichealthonline.info/pfizer-shedding-spike-proteins/>

There are likely many more articles that could. More testing needs to be done so that the truth can finally come forth and people can receive the treatment they so rightly deserve and not be treated as lepers because they do not agree with people who are making decisions which are compromised.

May God help you make your decision on this bill with discernment.
