

William Minier  
Albion

Thank you for reading my testimony. I have travel all across the state reading newspapers randomly from towns I traveled through. In most of these papers I found younger people who "died unexpectedly". A coach from Winslow, and a very popular influencer in the craft beer industry. He died in his 30's. We can assume that both were vaccinated, for they were in industry that had high rates of vaccination. My list of 25 names from the newspaper I passed into Jeanne Lambrew along with the 300+ healthy armature and professional athletes that have had adverse reactions while playing their sport. a large portion of these athletes died. The latest Vaers information found that there has been over a million adverse events to just the Covid Shots, and over 21 thousand deaths. Please approve this bill.
