

Isaac Morrison
Portland

Mandates forced me to resign my position at Maine medical center Portland. As a previously infected, November 2020, and positive immunity tested, October 2021, I've lost the job I love, associated income, and mmc loses a level 4 RT who's impacted hundreds of lives.

AAS in respiratory therapy 2010 southern Maine community college voted top in class by professors. Neonatal, pediatric, and adult ICU specialist, level 4 RT, ecmo specialist, all age external transport, shift charge role, ACLS/PALS/NRP certified.

These mandates have cost me income, hindering my ability to support my two daughters, and general unknown income future if these mandates remain.

After being considered a 'health's care hero' for 18mos this mandate has turned me into a 'ZERO'?!? My skills have only improved during this disaster and I'm sorry I cannot continue to provide the skills Maine needs due to unfounded unconstitutional mandates.
