I support LD 867 Bill, an Act to Prohibit Mandatory COVID-19 Vaccinations. The repercussions and harm that have come out of this vaccine, not just to adults, but children as well, is more than enough incentive to do away with the COVID-19 vaccine all together. We need to keep our children's lives safe by removing the force of experimental drugs out of the public sector including school districts. This vaccine is not safe, and has caused a great deal of harm to many people. It should be discontinued immediately.
