To the honorable members-

I do not have a personal testimony about the widespread adverse effects from the various C19 vaccines, but I do have a special request. That request is for this legislative body to ask the following question before any and all deliberations regarding C19 begin; "Why would any government force its healthy citizens to take an unproven vaccine that does not prevent the spread and does not provide immunity for a virus that is 99.997% survivable for healthy people?" Please put your partisanship aside, employ common sense, and pass LD 867.

Sincere Thank-You,
David J. Pasquarello
