I am in favor of LD867. I am a psychiatric nurse practitioner working full-time in the state of Maine. I was raised in the state of Maine, love this state, but am now considering relocating out of the state of Maine for my residence and/or my profession, due to potential mandates for COVID-19 vaccination. If mandated for this vaccination I will unfortunately no longer be able to ethically work in Maine, which will contribute to the current shortage of psychiatric nurse practitioners.
