

David Plante  
NORTH BERWICK

I support this bill. The reasons are simple. 1. These vaccines are not necessary as there is no deadly pandemic that warrants such draconian mandatory vaccination measures. These vaccines are deadly. How many have to die before this to be admitted. You might as well put a gun to the head of each citizen of this state. Any type of force used, including having to choose between a fundamental right to work and submitting to a potential lethal injection is a complete violation of the Nuremburg code of medical ethics and constitutes a crime against humanity...and against the laws of God (thou shalt not kill).
