

Holly Robinson
York

Hello,

I am respectfully here to submit my concerns around the implications of this bill NOT passing. I feel so strongly that this bill needs to pass. If it doesn't and COVID vaccinations are mandated while they are so new you are putting so many of us at risk. I chose to vaccinate myself in the Spring of 2021 but am choosing to not receive boosters due to personal health consequences I faced as a result of the vaccine. I should not have to face a mandate in the future that would further derail the gains I have made.

In addition, if this bill do not pass, it would lead to a slippery slope of mandatory vaccinations for our students. I have two young children who will not be getting the covid vaccine (despite being fully vaccinated otherwise).

If covid vaccinations are mandatory for adults and god forbid kids in this state we will 100% be moving out of state.

I am a Maine resident and tax payer, I have a MSW and work in public education in York county. More importantly, I am a mother of two beautiful children.

Thank you for your consideration in passing this important bill.

Sincerely,
Holly Robinson
