I believe that it is absolutely criminal to subject anyone to a mandatory vaccine that has not withstood the test of time.

These COVID vaccine manufacturers are also free from any liability, and have purposely withheld any and all studies. The list of ingredients have not been fully disclosed.

They have an "acceptable" death rate, that is continually growing

That acceptable death is someone's mother, father, sibling, partner, spouse, child, or other relative.

If it were YOUR loved one, would their death be acceptable to you?

I also believe too that a person is entitled to Medical Freedom.

I know of numerous people who were vaccine injured, two which resulted in death. All of these were considered healthy, people without any previous medical history.

These injuries included brain aneurysm, transient paralysis, cardiac arrest, myocarditis.
