Why is it so important to get the covid19 shot?

Does it prevent me from getting covid19? NO

Does it prevent me from giving covid19 to someone else? NO

In fact all it does is possibly lessen the symptoms, for the person receiving the shot, no one else.

THEREFORE, it is NOT a vaccine. It's the covid19 equivalent of Theraflu, a common over the counter medicine.

So the answer to my first question is, control, you and the Democrat Socialist party want total control.

STOP pushing your mandates.

Let this country get back to being the United States of America ☐☐☐☐
