Falmouth
LD 1582

I am writing today in support of LD 1582. Any reasonable look at the science on the subject of Psilocybin assisted psychotherapy will show that the idea is well supported and should be implemented as soon as possible so people can access this medicine in a clinical setting.

Psilocybin has been granted break through status by the FDA and will likely make it through the FDA system as a approved drug in the coming years. But for the years before that happens this legislation could much needed access to Maine residents as well as allowing use of Psilocybin mushrooms, which some prefer to lab synthesized Psilocybin.

Thank you for your consideration.
