This bill is a concept draft with no language, brought forward at the last minute – having a public hearing and immediately going into a work session a half hour later. The people of Maine should be appalled. This is the people’s house – where the people should have a voice. How can you have a public hearing on a bill with no language? And then schedule a work session immediately after?

Abortion is NOT “reproductive healthcare.” Abortion not only destroys a young, speechless, unborn life, it also harms women, physically, emotionally, mentally and spiritually. The abortion industry wants women to believe that having an abortion gives them freedom and empowerment. But of course, that is not true.

Please vote NO on LD811.

Respectfully,

Susan Dench
