

Janice Flynn
Freeport
LD 214

I choose to reside in Freeport because it is a small town where residents get to be involved in the decision making process of local government. State government should not be allowed to pass legislation which applies a one size fits all approach and circumvents or ignores local rules or guidelines established by local residents. I support LD214 because it allows small towns to continue to decide what makes sense for their small town, especially regarding land use and zoning.
