This state definitely needs to forgive all fines for any business that has suffered from this unnecessary lockdown because of a virus with a 99.9% survival rate and medications that cure it easily. Masks are causing hypercapnia hypoxia irreversible brain and lung damage eye issues and periodontal diseases skin diseases and spreading bacteria and germs everywhere. Vaccine is not necessary and causing horrific damage including deaths. Virologist and biologists studying this so called virus and can NOT isolate a Corona virus in any samples at present. These people should not be suffering more from fines and taxation. They need licenses reinstated and let Maine people live again. We have all suffered enough damage from this unnecessary lockdown.
