Now this is an extremely important issue. These businesses are not responsible for government politics and should never have licenses held because of the unnecessary lockdown process of a political party. This so called virus was never a pandemic and deemed so by the Federal CDC months ago as an outbreak. There is NO medical data or evidence to prove its even a Corona virus. Virologist and biologists studying this so called virus can NOT isolate any Corona genomes in any samples. We have been lied to in the most horrific manner and licenses threatened and businesses held hostage by the Governor and a very uninformed Congress. This should never happen again. Hold businesses licenses to the laws of their businesses not for political gain. As well as holding good doctors and nurses licenses to go against the truth. Horrible
