

Sara-Miriam Gibely
Sweden

Dear Inland Fisheries and Wildlife Committee Members,
I would like to state for the record that I am very much in favor of passing LD 349 in order to protect our small, peaceful Keyes Pond in Sweden. I live a short walk away from Keyes Pond and go there to swim every warm day all summer. In the winter I will snow shoe across Keyes Pond once the ice is thick enough. The quiet and seclusion of Keyes Pond is what makes it a unique treasure in this Lakes Region. There are all kinds of lakes in the area each with it's own flavor an usages. Keyes Pond in one of the smaller, less used ponds and that is the way the citizens of Sweden wish to keep it. Please pass LD 349 to protect this bastion of simpler living from the noise and fumes of personal watercraft on our Keyes Pond.
Thank you. Respectfully submitted by Sara-Miriam Gibely resident of Plummer School Rd. in Sweden, ME.
