I am in favor the of the proposed legislation. Permits most certainly should be required for any high speed events on our Maine Lakes. As a resident of Little Sebago Lake for 40 years I have seen the huge increase in the amount of usage our lake gets. The loons and other wildlife are constantly threatened by the speed of watercraft and adding large events would certainly cause them grave danger. We need to protect these wildlife during crucial breeding times and when the young are on our lakes. Please vote to pass this legislation.
