In order to protect Maine's wildlife, I strong support this act to change our permissibility for high speed boats on our waters. As a Maine Master Naturalist, I have had many opportunities to enjoy and show others the awe and beauty of Maine's wildlife on the water and I would hate to see this compromised by high speed boat races.

With common sense precautions, high speed boating can happen in a way that does not hurt, or at least lesson the impact, on our vulnerable wildlife.

Thank you for your consideration,  
Bryce
