In Support of LD 394

Healthy, thriving wildlife is central to the Maine experience and to Maine's continued well being. Our task is to protect wildlife and wildlife habitat through legislation and education. We cannot default on this responsibility.

When issuing permits, Maine IF&W should weigh the impact of any activity or event on all wildlife, wildlife habitat and water quality as a logical extension of their existing and powerful charter.

Our critters need us to pass LD 394. Don't let them down. Please act now.

Rick Pilsbury, President  
Kezar Lake Watershed Association
